Title:	Beneficial Electrification Rebates
Date Reviewed:	July 22, 2025
Date Revised:	July 22, 2025

SUBJECT: BENEFICIAL ELECTRIFICATION REBATES

I. OBJECTIVE: To establish policy to encourage and sustain energy-efficient electric loads for San Miguel Power Association (SMPA) by offering incentives to implement certain energy efficiency measures in existing structures as well as new construction.

II. POLICY: It shall be the policy of SMPA that:

- A. Only installations within the SMPA service territory are eligible for the Beneficial Electrification rebates.
- B. SMPA will issue a Beneficial Electrification rebate to any member who applies and qualifies for the current programs that SMPA is offering. The rebates are available on a first-come, first-served basis until the budgeted funds are depleted. Once the budgeted funds have been depleted, it is solely at the discretion of the SMPA Board of Directors whether or not more funding will be added to the program.
- C. The Beneficial Electrification rebate will be issued in the form of a check.
- D. Rebate checks may be issued to the member or members on the account or to the property/project owner. An SMPA member or property owner may also sign an SMPA-approved form to transfer their rebate check to a third party of their choice. SMPA will also accept the transfer of the rebate back to the SMPA Green Fund as a donation.
- E. The Beneficial Electrification rebate funds, amounts, and guidelines of the rebate program may be reviewed and revised by SMPA management as necessary. Members are subject to the current programs offered and the current rules and guidelines of those programs. Staff will advise the Board of Directors as guidelines are updated.
- F. SMPA reserves the right to inspect any installation within two years (24 months) following the initial installation.
- G. Staff will develop an annual report on the number of Beneficial Electrification rebates issued.

III. RESPONSIBILITY: It shall be the responsibility of the General Manager/CEO to see that this policy is implemented and followed.
